

# DuraCloud Pilot Program: utilizing cloud infrastructure as an extension of your repository

Michele Kimpton Project Director, DuraCloud OR2010, Madrid Spain July 7, 2010

#### DuraSpace not for profit

#### **Overview**

- DuraCloud platform
- Results of survey
- Pilot program
- Use cases
- Future direction

more distributed

More collaborative

more web-oriented

more open

more interoperable

# Implications for our future work

#### Cloud Infrastructure

A style of computing where massively scalable IT-related capabilities are provided "as a service" using Internet technologies to multiple external customers.

(Gartner, 6/08).

#### **DuraCloud Platform**

Open technology and hosted service for utilizing cloud infrastructure for preservation support and access services

Features:

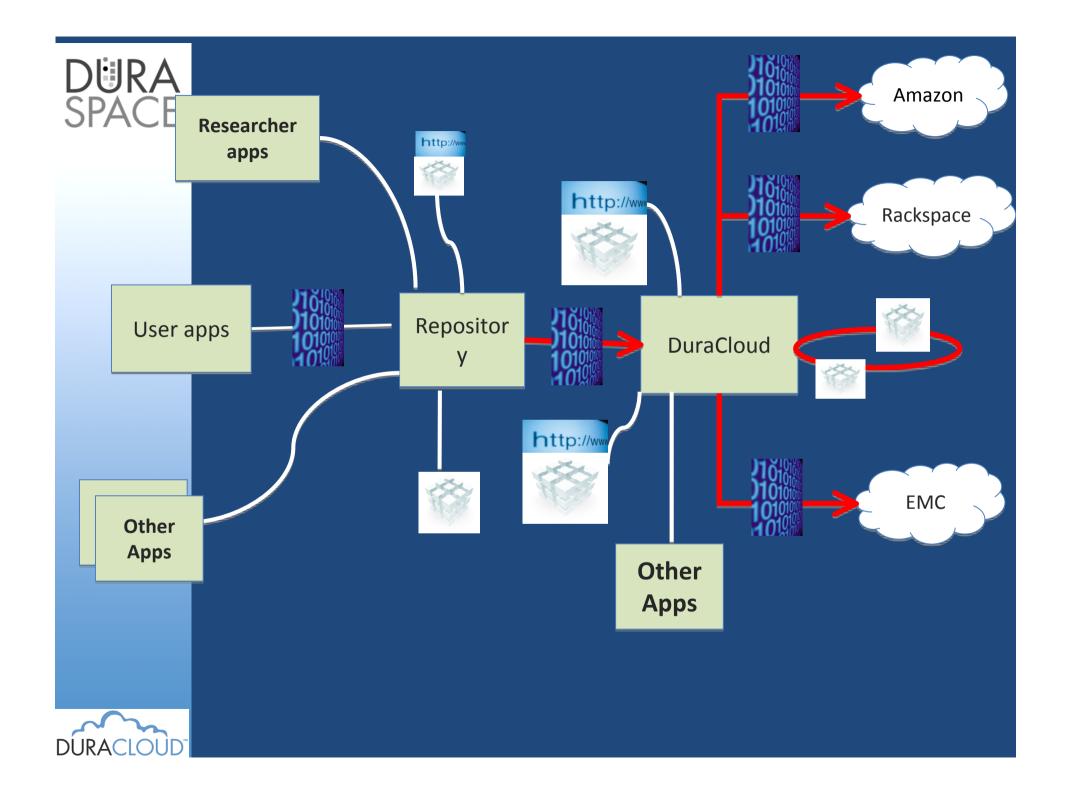

Interoperable across multiple cloud providers

Web enabled

Built on highly scalable, flexible infrastructure

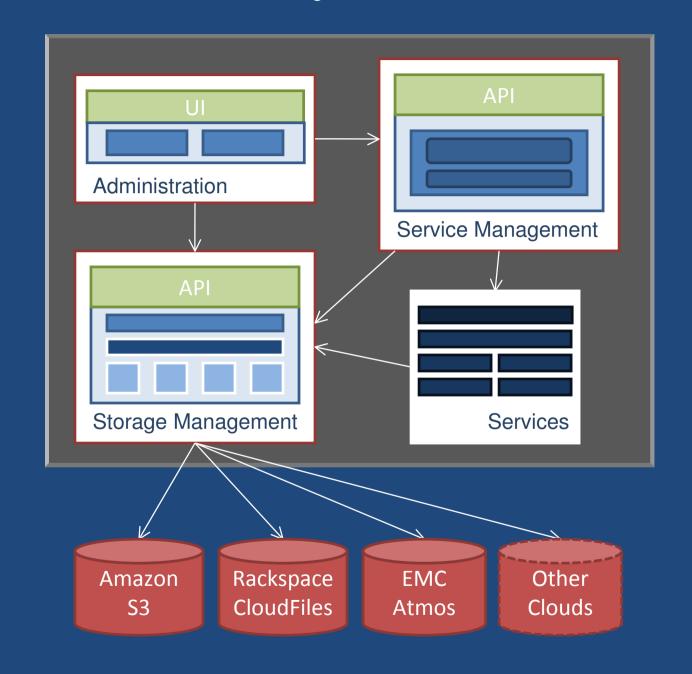

Open API's for easy integration

#### DuraCloud High Level Interaction

#### Services and Capabilities

Replication

**Image Viewing** 

Image Transformation

**Media Streaming** 

Bit Integrity Checking

**General Compute Services** 

...more on roadmap

#### Key Advantages Cloud

completed 1/22/2010 145 participants higher ed

Most Impactful Advantages Electronic Survey	Responses
Scalability	79
Remote, Off Campus Storage of Digital Assets	64
Ease of Implementation	54
Flexibility	53
Don't Have to Staff Locally	39
Cost	33
Elasticity	26
Pay for Use	14
Other	5

#### Key Challenges Cloud

completed 1/22/2010 145 participants higher ed

Key Challenges Electronic Survey	Responses
Trusting Third Party to Manage Critical Assets	64
Long-term Reliability of Solution	52
Data Security	51
Performance and Bandwidth Concerns	37
Loss of Control	34
Administrative Burden of SLAs	17
Transparency of Solution	16
Concerns about Data Lock-in	16
Less Customizable	10
Other	12

## Likely to use cloud services in next 12 months

Percentage of electronic survey respondents noting it is "very likely" or "likely" they will use cloud compute or cloud storage services to manage, store or provide access to digital collections in the next twelve months.

Cat	egory	Subcategory	Percentage	
Nor	Non-US		47.7%	
US	US		51.3%	
	Institution	Large, very large	47.2%	
		Medium	68.8%	
ns	Size	Small, very small	42.9%	
utio	Size Enrollment Profile	RU/VH	52.1%	
stitu		RU/H, DRU	50.0%	
l S		Master's S, M and L	46.2%	
)   		Bac and Assoc	57.1%	
	Public/	Public	46.9%	
	Private	Private	59.3%	

# Institutional needs: managing digital collections

Service Area	Importance	Extent Need is Met	Difference	Likelihood to Use Cloud Services
Remote secondary storage	3.54	2.60	0.94	3.09
of digital collections				
Preservation support	3.35	2.17	1.18	2.88
Intra-institution shared collections	3.11	2.47	0.64	2.69
Inter-institution shared collections	2.72	2.07	0.65	2.67
Compute services	2.80	2.25	0.55	2.54
Online primary storage	3.51	2.97	0.53	2.29

#### Purpose of Pilot Program

- Engage with users whom have concrete use cases and want to test the software
- Real data at scale
- Uncover the obstacles
- Engage community response and assessment

#### Partners and Pilots

Selected initial cloud providers

Selected 3 initial pilot partners

#### WGBH DuraCloud Pilot Goals

#### Preservation

- Uncompressed video and audio archival storage
- Monitor and audit content
- Replicate to multiple locations

#### Access

- Streaming audio and video
- Video editing, transcoding
- Researcher and third party access

Ingest

#### WGBH Preservation services utilizing DuraCloud

Digital Access Preservation file Management Repository Open Vault Fedora system DAM Preservation file File Sync Preservation support: File validation Replication management WGBH DuraCloud Instance Administrative access Error checking File migration/transformati on RackSpace **EMC** Amazon Monitoring

#### WGBH Access Services utilizing DuraCloud

Digital Access Management system

Access file

Access services:

Streaming

Ingest

File format transformation

File access collaboration

WGBH DuraCloud Instance

Amazon

EMC

RackSpace

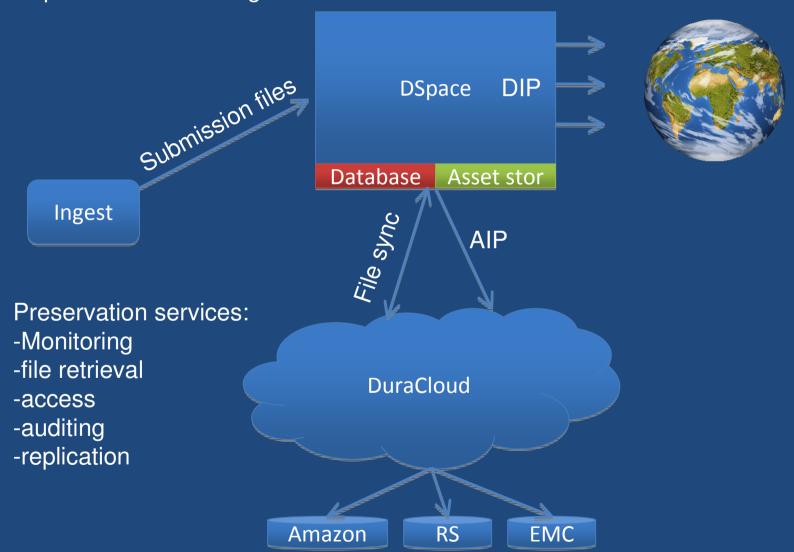

#### MIT DuraCloud use case, preservation support

- -Retrieval of lost files (admin error)
- -Replacement of damaged files

#### **Lessons Learned**

- Storage is competitive, bandwidth can be costly
- Internet Latency is high
  - Minimize transactions across the wire
  - Data should be close to compute
- Files must be less than 5 gigabytes
- Market still developing

#### Best "fit" use cases for Repositories

- Preservation and management
  - Second copy in cloud
  - Synchronization with primary store
  - Audit and monitoring
- Researcher, or 3<sup>rd</sup> party access
- Easy Provisioning for storage or compute

#### **Pilot Partners**

University	Use Case	Repository
Rice U	Preservation	DSpace, meta archive
Hamilton College	Access/international collaboration	Fedora
Northwestern U	Preservation books, audio, image	Fedora
U of PEI	Image viewing/hosting	Fedora/Islandora
Cornell U	Data stream access and preservation	Fedora
ICPSR	Access and Preservation	Fedora
SUNY Buffalo	Preservation	DSpace
IUPUI	Preservation	DSpace
Rhodes College	Image Access	DSpace
North Carolina State U	Preservation	DSpace
CARL	Preservation and Services	Fedora
Orbis Cascade Alliance	Preservation and Services	DSpace
MIT	Preservation, OAIS compliance	Dspace
NYPL	Preservation and Services	Fedora
WGBH	Access and Preservation	DAM

#### Timeline

- Begin pilots

  Oct 2009
- DuraCloud Alpha Pilot release- Oct 2009
- Initial pilots complete
   July 2010
- Expanded pilot begins

   Summer 2010
- Code available open source-TODAY
- Pilot testing with software services -Fall 2010
- Cloud partner evaluations complete-Winter 2010
- Report pilot results Winter 2010
- Launch hosted service Winter 2011

### DuraCloud now available open source

- Open core
  - ✓ Open API
  - ✓ Open Source
  - ✓ Apache-style license
- Architecture to create cloud networks
  - ✓ Public clouds
  - ✓ Private clouds
  - ✓ University consortia
- Partner implementations/Integrations

#### Thank You
